Sub: Implementation of Rake Monitoring System (RMS) at Central Warehouses...reg.

Sir,

This is to inform that in order to have a better management and monitoring system in place on Rake Operations at Warehouses of CWC wherein Railway Rakes are being handled or likely to be handled, a new Online module called **"Rake Monitoring System"** (RMS) has been developed by the MIS Division, CO on the basis of inputs of Commercial Division to digitize the monitoring of Rake operations for better reporting in a transparent manner. Rake Monitoring System (RMS) will provide a single platform from where live monitoring of Rakes handled by a Warehouse, H&T Contractor can be viewed from Regional Office and Corporate Office level.

There are three types of roles defined in RMS at Corporate office, Regional and Warehouse level for monitoring, user creation and actual rake operation. The login in RMS is mandatory at Warehouse level and the account of the Warehouse may get blocked if not logged in on a daily basis for 3 days. Warehouse staff needs to daily update the details in RMS and if no rake is handled, in that case a NIL entry under rake handled to be posted.

The Login Credentials of all Regional Managers have been created and an option for ID creation of Warehouse staff has been provided in RM's module from where RM's can create the user ID of Warehouse staff concerned to use the RMS system where Rakes were being handled or likely to be handled. RM's are requested to change their passwords immediately after login in RMS portal and thereafter from time to time for better security.

The online Rake Monitoring System portal can be accessed through the following steps in regions as follows:

1. Open the link **103.27.86.205:8020** in the browser
2. It will redirect to LOGIN page.
3. User will enter the LOGIN ID and PASSWORD which will provided by the Corporation to relevant Regional Manager.
4. RM's can create the user credentials of Railhead/CW users.

The login details are given as under:
