Subject: Star Rating of Warehouses on the basis of Safety cum General Assessment.

Sir,

Last year, we had started Safety Audit drive and with the active participation of all, result have found encouraging. Now the focus is to meet the ISO standard and QCI star rating. In this process, QCI has audited 210 food grain centers being utilize by FCI and graded our CWs ranking from 2 star to 5-star.

Management has decided to merge QCI and Safety audit parameters and do the audit of all CWs afresh. Total 136 parameters are required to be updated as per the site condition (actual).

Therefore, RMs are advised to ask their Warehouse Managers to fill up the Live portal MPR. Latest by 30.09.2022 positively. They are also requested to monitor and follow up for needful compliance within the prescribed time line.
